PRODUCT DESCRIPTION & TECHNICAL COMPOSITION

DESCRIPTION

XtraHide is a unique formulation that uses a synergy of moisturisers and delicate cleaners to keep leather soft and supple.

XtraHide is predominantly water-based making it ideal for light coloured leathers that show the most dirt. The product can be used on all different articles of leather, from furniture and car interiors; to shoes and equestrian leathers.

For heavily ingrained dirt, use an XtraWeb agitator to help displace soiling without damage. Suitable for use alongside the entire Xtra Range. Please note that XtraClean must be the base applicant if you wish to combine multiple products. Not for use on nubuck or suede.
